PROFILE

I am a highly skilled and motivated front-end developer with a strong foundation in HTML/HTML5, CSS/CSS3, and JavaScript, complemented by expertise in TypeScript. I specialize in building responsive and user-friendly web applications using modern frameworks like React and Next.js, along with styling tools such as Bootstrap, Tailwind, and SCSS/Sass.

I am proficient in working with essential web development tools, including JSON, AJAX, Git, GitHub, and have experience in unit testing with Jest. My technical versatility extends to languages like Python, C, C++, Java, PHP, and MySQL,

I am passionate about continuous learning and thrive in environments that challenge my problem-solving abilities. My personal skills include teamwork, adaptability, and the ability to work effectively under pressure. I am committed to delivering high-quality code and seamless user experiences in every project I undertake.

EXPERIENCE & PROJECTS:

- PORTFOLIO

- MY PORTFOLIO

I created a fully responsive portfolio website to introduce myself and showcase my skills using React.js, Next.js, Tailwind CSS, and Framer Motion.

- E- COMMERCE

- ONLINE SHOP WITH REACT

I created a responsive e-commerce website for app back cover products using the React.js framework and Bootstrap CSS framework. I used a JSON server to get products and authentication APIs

- BOOKING SITE

- DENTIST BOOKING SITE

A responsive dental appointment booking website developed using React.js, Tailwind CSS and HTML for seamless appointment scheduling and easy navigation. An easy-to-use admin dashboard is integrated to analyze data and manage bookings.

- TRAVEL WEBSITE

- TRAVEL WEBSITE WITH NEXT

A responsive travel website built with React.js, Next.js , Typescript and Tailwind CSS, designed for effortless trip planning and smooth user navigation.
