PROFILE

I am a highly skilled and motivated front-end developer with a strong foundation in HTML/HTML5, CSS/CSS3, and JavaScript, complemented by expertise in TypeScript. I specialize in building responsive and user-friendly web applications using modern frameworks like React and Next.js, along with styling tools such as Bootstrap, Tailwind, and SCSS/Sass.
I am proficient in working with essential web development tools, including JSON, AJAX, Git, GitHub, and REST-API, and have experience in unit testing with Jest. My technical versatility extends to languages like Python, C, C++, Java, PHP, and MySQL,
I am passionate about continuous learning and thrive in environments that challenge my problem-solving abilities. My personal skills include teamwork, adaptability, and the ability to work effectively under pressure. I am committed to delivering high-quality code and seamless user experiences in every project I undertake.
